Re: Notice of Security Breach

On December 5th, 2025, a suspicious email was sent from a student account to multiple other student accounts. This email was a fake advertisement for a Kuna School District Job with a link to a Google Form posing as the job application. The form asked for the following: Name, Age, Gender, Personal Email, School Email, Phone Number, Home Address, Job, Do you have a bank account?, Bank Name, Do you have a credit card?, Ok to contact you?

As soon as the IT department was notified, the email account was suspended, and all suspicious emails were removed from inboxes. Out of caution, IT changed all passwords of students who clicked the link to the form.

Upon further investigation on December 8th, it was found that the student's account had been accessed from an external actor. The actor was found to have accessed the student's email account, created the email, and sent the email. No access to other student systems was found. No exports were found from the student account. We could not verify whether any students completed the form, but we have reason to believe some did.

Affected student families were emailed on December 8th, 2025, explaining the situation and to discuss with their students if they had filled out the form. We are continuing to monitor the situation. For further information or to advise, please contact me at 208-472-9700.

Sincerely,

Cam Elwood  
Director of Technology
