**Re:    Client                                :    Post Holdings**  
     **Matter                                :    Data Security Incident**

---

Dear Attorney General:

We are writing on behalf of Post Holdings with respect to a potential data security incident described in more detail below. Post Holdings takes the security and privacy of the information in its control seriously and has taken steps to prevent a similar incident from occurring in the future.

This letter will serve to inform you of the nature of the security breach, the number of Idaho residents that were potentially affected, what information has been compromised, and the steps that Post Holdings took to secure the integrity of its systems.

1. Nature of the Security Incident

On September 11, 2026, Post Holdings determined that personal information may have been impacted as the result of unauthorized access to our network environment first detected on August 20, 2026. Upon first learning of the incident, Post Holdings did not have evidence suggesting sensitive data was impacted. Post Holdings immediately retained cybersecurity experts to secure its network and to perform an investigation to determine whether sensitive information was impacted and to whom that information related. Individuals are being notified based on the results of this analysis.

The forensic investigation determined that certain files may have been accessed without authorization. Post Holdings then undertook a comprehensive review of the data potentially impacted in this incident to determine whether personal information may have been involved.

After reviewing its potentially impacted data, the Post Holdings team determined that certain individuals were potentially impacted on September 11, 2026.

2. What Information Was Involved

Post Holdings found no evidence that personal information had been specifically misused; however, it is possible that the following information was potentially compromised: first name, last name, and driver's license number.

3. Idaho Residents Notified

The total number of impacted Idaho residents is one individual. Notification to impacted individuals was completed on October 7, 2026.

4. Steps Taken

Although Post Holdings is not aware of any evidence of misuse of personal information, Post Holdings will extend to the potentially impacted individual an offer for free credit monitoring and identity theft protection through CyberScout, a TransUnion company. This service will include 12 months of credit monitoring, along with a fully managed identity theft recovery service, should the need arise. Post Holdings has changed passwords, strengthened password requirements, and implemented stricter multi-factor authentication requirements.

5. Contact Information

Post Holdings remains dedicated to protecting the sensitive information in its control. If you have any questions or need additional information, please do not hesitate to contact me at [Liam.Jordan@LewisBrisbois.com](mailto:Liam.Jordan@LewisBrisbois.com) or 215.253.4174 .

Very truly yours,

**Lewis Brisbois Bisgaard & Smith LLP**
